CONJUNCTIVE MANAGEMENT RECOMMENDATIONS IN THE SRBA TEST BASINS

(page 1 of 2)

Basin	Recommendation Reviewed by Idaho Supreme Court	Present Director's Recommendation								
36	<p>ADMINISTRATION OF BASIN 36 RELATIVE TO THE SNAKE RIVER.</p> <p>The Eastern Snake River Plain Aquifer, the springs tributary to the Snake River or other surface tributaries, and surface tributaries to the Snake River in Basin 36 downstream from the Milner Dam are hydrologically connected to varying degrees.</p> <p>The perched aquifer in the Rupert area is tributary both to the Snake River upstream from the Milner Dam and to the Easter Snake River Plain Aquifer. Basin 36 water rights for surface and ground water, and Snake River water rights will be administered conjunctively, pursuant to law, with due consideration as to actual impacts of ground water diversions on senior water rights.</p>	<p>The following water rights from the following sources of water in Basin 36 shall be administered separately from all other water rights in Basin 36:</p> <table><tr><td><u>Water Right No.</u></td><td><u>Source</u></td></tr><tr><td>None</td><td>None</td></tr></table> <p>The following water rights from the following sources of water in Basin 36 shall be administered separately from all other water rights in the Snake River Basin:</p> <table><tr><td><u>Water Right No.</u></td><td><u>Source</u></td></tr><tr><td>None</td><td>None</td></tr></table> <p>All water rights within Basin 36 are from connected sources of water in the Snake River Basin and shall be administered conjunctively.</p>	<u>Water Right No.</u>	<u>Source</u>	None	None	<u>Water Right No.</u>	<u>Source</u>	None	None

57	<p>Information currently available to IDWR does not provide a complete understanding of the interrelationship between water sources in Basin 57 and the Snake River; however, it does indicate that water sources in Basin 57 do not provide a significant amount of water to the Snake River. Therefore, the water sources in Basin 57 are not subject to administration as part of the Snake River at this time, but may become subject to such administration if the Director determines that such administration is necessary to protect senior rights from the Snake River.</p>	<p>The following water rights from the following sources of water in Basin 57 shall be administered separately from all other water rights in Basin 57:</p> <table><tr><td><u>Water Right No.</u></td><td><u>Source</u></td></tr><tr><td>None</td><td>None</td></tr></table> <p>The following water rights from the following sources of water in Basin 57 shall be administered separately from all other water rights in the Snake River Basin:</p> <table><tr><td><u>Water Right No.</u></td><td><u>Source</u></td></tr><tr><td>None</td><td>None</td></tr></table> <p>All water rights within Basin 57 are from connected sources of water in the Snake River Basin and shall be administered conjunctively.</p>	<u>Water Right No.</u>	<u>Source</u>	None	None	<u>Water Right No.</u>	<u>Source</u>	None	None

TABLE NO. 1

CONJUNCTIVE MANAGEMENT RECOMMENDATIONS IN THE SRBA TEST BASINS

(page 2 of 2)

Basin	Recommendation Reviewed by Idaho Supreme Court	Present Director's Recommendation
34	<p>ADMINISTRATION OF SURFACE SOURCES WITHIN BASIN 34. All surface waters of the Big Lost River and its tributaries shall be administered as a single water system, except as provided in this general provision 2.a. through 2.c.</p> <p>a) During the irrigation season, from the time the flow at the Howell gage increases to 750 CFS, until the time when the flow recedes to 300 CFS, all surface waters of the Big Lost River and its tributaries, except as listed in paragraph b. below, shall be administered as a single water source. At all other times natural flow water rights (other than water rights for storage purposes) with a point of diversion above Mackay Reservoir shall be administered separately from the natural flow water rights with a point of diversion downstream from Mackay Reservoir. This provision is made under conditions existing as of the commencement of the SRBA (including diversions above the Howell gage); if diversions are made from the Big Lost River or its tributaries above the Howell gage pursuant to rights not existing as of the commencement of the SRBA, then the amounts diverted will be added to the amount of the flow at the Howell gage for the purposes of applying this provision.</p> <p>b) The surface waters of the following streams shall be administered as separate from the surface waters of the Big Lost River [listing of streams]</p> <p>CONJUNCTIVE MANAGEMENT OF GROUND AND SURFACE WATER RIGHTS WITHIN BASIN 34.</p> <p>a) Some ground water rights in the list of water rights are described as being administered separate from the Big Lost River and its tributaries. All other ground water rights not so described will be administered as part of the Big Lost River and tributaries.</p>	<p>The following surface water rights from the following sources of water in Basin 34 shall be administered separately from all other surface water rights in Basin 34:</p> <p style="text-align: center;">SEE ATTACHMENT A [This is a listing of sources and water rights]</p> <p>The following surface water rights from the Big Lost River and its tributaries upstream of Mackay Reservoir shall be administered separately from all other non-storage, surface water rights from the Big Lost River downstream of Mackay Reservoir during two periods of time as follows:</p> <p>a) From the beginning of the irrigation season until the time on the rising stage of the Big Lost River when the maximum flow at the Howell gate reaches at least 750 cubic feet per second at any time for three consecutive days; and</p> <p>b) After the time on the falling stage of the Big Lost River when the minimum flow recedes to no more than 300 cubic feet per second at any time for three consecutive days until the end of the irrigation season</p> <p style="text-align: center;">SEE ATTACHMENT B [This is a listing of sources and water rights]</p> <p>All water rights within Basin 34 are from connected sources of water in the Snake River Basin and shall be administered conjunctively.</p>
